

Front of Shutter

<p>60</p> <p>Stiles can be reduced to 45mm for narrow shutters. (extra costs may be incurred.)</p>	<p>The 140mm on the rails varies as the blade increments are constant. We trim the rails to suit. The top rail will not be bigger than the bottom rail unless otherwise specified.</p>
	<p>A midrail should be used if the shutter is more than 1800mm Drop. Or unless specified to hide a bar or catch etc.</p>
	<p>Rails can be laminated to a specified size if required. Rails also can be reduced by inserting another blade into the shutter if at all possible. (Extra costs may be incurred.)</p>
